Note:

- Boards and management of individual public hospitals are responsible for the accuracy and the integrity of patient data submitted to NTPF.
- Statistical Disclosure Control (SDC) techniques have been applied to the data to preserve confidentiality and mitigate against identification or self-identification of individuals. In cases where there are less than 5 people in any particular cell, we have replaced that value with the average (mean) of all values that are less than 5 across that category. Any decimal values which arise have then been rounded. This may cause some rounding to occur when calculating sub-totals.

Where there are <20 patients waiting in a particular specialty/hospital, we have aggregated the numbers under a 'Small Volume' heading.
