

Steps undertaken by the NTPF before upload to database

Before uploading the concatenated file there are a number of changes and formatting required to the file. There were also a number of work arounds created and assumptions made around the data to facilitate the pilot project, in particular the identification of potential planned procedures through the use of order priority fields and the calculation of an indicative date. There is no restarting of waiting time clocks in the development of these reports.

- Anonymise file – the removal of all Patient Individual Identifiers (PII's) from the CSV file once received before being concatenated.

- Order Priority – As agreed for the pilot, all blanks within the Order Priority field were converted to Routine

- File Date – A column was added to include the file extraction date based on the file header and name configuration

- Days Since Ordered – A column was added to calculate the Days Since Ordered (NUMDAYS) the formula was File Date – Order Date

- Hospital Region – Column identifying the hospital region was also added before uploading

There are a large number of exclusions from the extract files in the form of the Radiology Waiting List Data Profile as developed by the Planning and Performance, Actute Hospitals Division, HSE , the National NIMIS team and the NTPF.

Extract file – Exclusions = Uploaded Records

CAVEATS (January 2026 - March 2026) Subject to on-going review as the project progresses

Data contains urgent, routine and surveillance/planned activity which is currently not broken down in detail, as such this includes surveillance/planned activity which may not be exceeding planned date.

Data is still undergoing validation at Hospital and Hospital Region level.

Data does not take into account local nuances at site level which may change (Site profile developed to support understanding of same).

The purpose of this aggregate data is to provide a National Level overview of the number of patients waiting for modalities of CT, MR and US.

This report is not intended to be used for the active management of hospital diagnostics waiting list, local reports and mechanisms should continue to be used for the management of diagnostics waiting lists at hospital level.

Note: Q1 2026
Crumlin Childrens Hospital and Temple Street Hospital are submitted under CHI.

No data received for Mallow, Bantry and CUH due to system upgrade.
