21. “That Seanad Éireann:

- notes the swift response and work of local authority workers during the cold weather emergency;
- condemns Government for its slow national response to the recent weather crisis;
- is concerned that no national co-ordination plan for severe weather emergencies is in place to co-ordinate local plans at a national level;
- recognises the social and economic hardship caused by water restrictions and by local transport network disruptions;
- recognises that an inefficient, outdated and fragmented water network has contributed to water problems across the State;
- notes with concern that on average 43% of Ireland’s treated water supply was lost through unidentified leaks before the recent severe cold weather;
- notes the refusal of the Government to put additional financial measures in place to address severely damaged local and regional roads;
- recognises that the 32% cut in the regional and local road upkeep budget implemented by the Department of Transport last year compounded damage caused by cold weather;

and calls on Government to:

- establish a single water semi state utility company to take over responsibility for water investment and management on a national basis;
 - reallocate future water funding from the exchequer to prioritise water conservation;
 - examine all engineering resources of the State to ensure a rapid remedy to widespread burst water mains;
 - develop and test as a matter of priority a national severe weather emergency plan that outlines the actions to be taken by Government and its agencies; and
 - provide additional funding for the restoration of severely damaged local and regional roads for reasons of road safety and to minimise costly reconstruction costs caused by further deterioration.”.
